

Influenza Vaccine Waiver Form

Did You Know?

- CDC and the Advisory Committee on Immunization Practices (ACIP) recommend that all health care workers get an annual flu vaccine.
- Fewer than half of health care workers report getting an annual flu vaccine.
- As a health care worker, by getting vaccinated, you can help protect your family at home and your patients at work from getting sick.
- Influenza outbreaks in hospitals and long-term care facilities have been attributed to low vaccination rates among health care professionals.
- Studies have shown that higher vaccination rates among health care workers can reduce influenza-like illness, and even deaths, in settings like nursing homes.
- Health care workers play an important role in protecting public health, and your co-workers need you to be healthy and able to cover your shift.
- Getting a yearly flu vaccine can help ensure your time off is spent doing what you want to do, not staying at home sick.

I have read and understand the above facts but elect to decline the Influenza Vaccine.
